EXTRA SAVINGS ON PACKAGES!

Dust Extractors

As important as the air you breathe

Dust control is an integral part of the Festool system and design philosophy. We believe you will find our dust extractors to be among the best in the industry, with benefits not found on other vacuum systems. Festool offers a full line of dust extractors optimized for the way you work.

The CT MINI and CT MIDI are practical and lightweight, with an integrated hose garage.

They are best suited for smaller jobs or when compact portability is a priority. The CT 22 and CT 33 are better suited for all-around performance in the shop or construction site. These larger versions come standard with HEPA filters and can be outfitted with a rear-mounted handle for increased mobility or the Boom arm accessory for use in the shop.

TS Plunge Saw & Guide Rail

The one tool no carpenter should be without

Take the precision, power, and performance of your cabinet saw to the jobsite in a portable system. Festool TS saws and guide rails offer perfect guidance and splinter free cuts at any angle.

In the shop and on the jobsite, more and more top finish carpenters, remodelers, and professional woodworkers are doing better work in less time with the TS saw and guide rail system.

Learn more about this amazing system at festoolusa.com/tsvideo

"I've never screwed up a cut with a Festool."

Peter Bogart, Carpenter

"I can work more efficiently while obtaining a higher degree of quality".

Charlie Peterson, Master Craftsman

"I never knew precision could be this portable."

Eiji Fuller, Finish Carpenter and Millworker

T+3 Lithium Ion Cordless Drills

Different by design

Our cordless drills look different, because they are different. Crafted to the highest level of German engineering, Festool cordless drills offer a level of quality and value not found in other cordless systems. From the EC-TEC brushless motors to the interchangeable Centrotec and FastFix chucks, these cordless drills were designed to work the way you work.

Thanks to Festool's innovative FastFix chuck system, the T+3 cordless drills are incredibly versatile, capable of doing the work of five different drills in one. Couple that versatility with long run times, light weight, and a compact design with full size power and you have the perfect drill/driving solution.

The T+3 cordless drill set includes all chucks except the optional depth stop chuck.

FastFix Chuck System

Five tools in one

When is a drill more than a drill? When it solves the problem and gets the job done with a fraction of the effort. One drill with multiple chuck options tackles all your projects.

- 1 The eccentric chuck is perfect for driving in tight corners and against adjoining edges.
- 2 The keyless chuck can be used with drill and driver bits up to 1/2" in diameter.
- 3 The compact, quick-change Centrotec chuck is complemented by a full range of Centrotec drill/driver bits.
- 4 The rotating, right-angle chuck enables full drill/driving capability in even the tightest spaces.
- 5 The optional depth stop chuck provides consistent, precise depth settings regardless of workpiece material.

Centrotec System

A more complete drill/driving system

The latest addition to the quick-change Centrotec system, these imperial drill bits feature a spur-less design with beveled chamfers and sharpened flutes to keep entry and exit holes clean and precise.

Set includes:

- 8-piece brad point style bits
- Imperial sizes (1/8", 3/16", 1/4", 5/16", 3/8", 7/16", 1/2")
- Features Centrotec shank
- Includes single flute countersink 3/16" - 19/32"

Imperial Drill Bit Set
496 942

\$125.00

Multi-Jetstream

Increased efficiency for Festool 6" sanders

Building on existing industry-leading performance, the Multi-Jetstream design incorporates a modified hole pattern that increases airflow, and results in even better dust extraction efficiency.

Designed for our 6" sanders, the new pads incorporate an enhanced, heat-resistant StickFix design, extending both pad and abrasive life considerably.

The patented Multi-Jetstream system improves sanding results, saves time and extends abrasive life, not just with more holes but with the interaction of intake and exhaust air for improved extraction in, across, and through the pad.

See website for a complete listing of new Multi-Jetstream pads and abrasives

4mm Domino

You asked for it, we delivered

Looking for the ideal way to align and join 1/2" stock? Now, with a 4 mm cutter and matching tenon, the Festool DOMINO can join material as thin as 1/2" for drawers, small boxes, and small moldings for decorative work.

EHL 65 One-Handed Planer

Just plane smooth

So many planing tasks require working in awkward and sometimes difficult to reach areas. The ergonomics of the EHL 65 allow for one handed operation when tackling challenging cuts. All this, while providing smooth and clean, chatter-free cuts

thanks to the single-knife spiral cutterhead design. This planer can power through the toughest tasks while providing exceptional dust extraction.

EHL 65

48" Installer's Level

Festool Exclusive with Illuminated vial

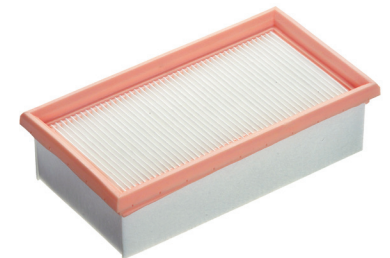

This 48" level is the ideal solution for window, door and cabinet installers, as well as remodelers of all types. Equipped with lighted vials for low-light environments and bridged center vial for continuous scribing. Integrated imperial/metric scale is based on a zero centerpoint for easy layouts. Manufactured exclusively for Festool by Stabila in Germany.

HEPA for MINI/MIDI

Our highest standard for filtration

Upgrade your CT MINI or MIDI with a HEPA filter that provides filtration at 99.97% efficiency to 0.3 microns. The human hair measures 50 – 80 microns in diameter. In comparison, wood smoke measures at 1 micron. Breathe easier in the shop or the jobsite with HEPA filtration.

HEPA Filter
